# PUBLIC TRANSPARENCY REPORT

2023

# New Zealand Superannuation Fund

Generated 15-12-2023

# About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

# Disclaimers

# **Responsible investment definitions**

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

# Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

#### Section 1. Our commitment

Why does your organisation engage in responsible investment?

What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

The Guardians has a long-standing commitment to Responsible Investment (RI) that is informed by our statutory mandate to administer the Fund on a prudent, commercial basis and, in doing so, manage and administer the Fund in a manner consistent with: Best practice portfolio management; Maximising return without undue risk to the Fund as a whole; Avoiding prejudice to New Zealand's reputation as a responsible member of the world community.

One of our key investment beliefs is that 'environmental, social and governance (ESG) considerations, including climate change, are fundamental to long-term risk and return.' As a long-term investor, we are committed to active ownership and the promotion of good governance for the overall health of the capital markets.

We have recently completed a three-year programme to review our RI approach and, as a result, the Guardians' Board has agreed that best practice means supporting the goal of transitioning to a sustainable financial system. Accordingly, we have moved to an explicit Sustainable Investment (SI) approach, which means that as well as considering the impact of ESG on our investments, we consider the impact of our investments on the environment and society.

Our approach to SI is governed by our Statement of Investment Policies, Standards and Procedures (SIPSP), including a specific section which defines SI activities and references our SI Framework as the basis for implementation (https://nzsuperfund.nz/how-we-invest/sustainable-finance/).

The Board, CEO, CIO, leadership team and Investment Committee have oversight of the SI Framework and integration of SI into investment decisions. The Head of SI reports directly to the CIO, annually to the Investment Committee and annually to the Board, which is the ultimate owner of the SIPSP and SI Framework. Any changes to Investment Policies or the SI Framework must be approved by the Board. The Board includes SI in its strategic goal setting and has education sessions on SI topics.

Our work programme is led by the SI team as a central resource of ESG expertise, including on climate change and investment professionals have their own responsibilities to integrate ESG issues within investment decisions and management. In addition, the Corporate Strategy (including Communications and Legal) and the Investment Operations (including Risk) teams provide relevant support for the SI work undertaken.

The Risk Committee provides additional oversight of ESG risks that are identified with investments. SI and ESG considerations are integrated across the Fund's investment activities and asset classes – SI is integrated into portfolio design through the way we define investment opportunities and allocate risk budgets to those opportunities, investment selection and due diligence, ownership activities such as managing our external investment managers, exercising our voting rights and engaging with companies to improve their ESG policies and practices.

In 2021, the Guardians reviewed our organisational vision and purpose statements, incorporating sustainability into both. The organisation's vision is "An inclusive team creating a better future through investment excellence". We consider that investment excellence includes sustainability. Our purpose is "Sustainable investment delivering strong returns for all New Zealanders".

The Guardians has recognised climate change as an investment risk since 2006 when we supported the Carbon Disclosure Project. We deepened our analysis of climate change as a systemic risk in 2014, supporting research by Mercer. We also saw responses to climate change as an opportunity and began investing in renewable energy. We have had a Climate Change Investment Strategy in place since 2016. In 2017 we published our first portfolio carbon footprint and carbon reduction targets for 2020, based on reducing carbon emissions intensity and reducing exposure to potential emissions from carbon reserves. Since then, we introduced carbon exclusions for some external manager equity mandates, applied our bespoke carbon methodology to the rest of our active equity mandates, and set out our expectations that multi-factor managers meet our reduction targets.

We met our 2020 carbon reduction targets a year early and set new targets for 2025. We continue to work with companies in which we have made a significant direct investment to encourage them to complete their carbon footprints. The number of companies doing so has increased. Where companies do not complete their carbon footprint, their footprint is proxied instead.

In 2021, the Guardians committed to achieve net zero by 2050, with interim reduction targets, and signed the Paris Aligned Investor Initiative Net Zero Asset Owner Commitment.

#### Section 2. Annual overview

• Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.

• Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):

- · refinement of ESG analysis and incorporation
- · stewardship activities with investees and/or with policymakers
- collaborative engagements
- · attainment of responsible investment certifications and/or awards

The most important SI issues for the Guardians are climate change, improving the ESG performance of our investment portfolio, transitioning from a Responsible Investment approach to Sustainable Investment (SI) and supporting the development of a more sustainable financial system.

We made substantial progress during FY2022/23. In June 2023, we completed the final phase of our three-year RI Compass Programme, a detailed review our RI approach that considered the requirements of our legislated mandate, evolving best practice, options to improve the ESG profile of the portfolio and increase the number/scale of impact investments.

The RI Compass Programme led to significant changes to our portfolio in FY2022/23. This included implementation of a Board decision to shift our benchmark Reference Portfolio of global passive equities to MSCI's Paris Aligned Benchmark (PAB) indices. The transition meant the largest part of the NZSF portfolio, approximately 40% of AUM, is in indices designed to facilitate achieving net zero by 2050. We selected off-the-shelf PAB indices, instead of customized indices, to support the market's development. The PAB indices result in a portfolio with fewer constituents with better ESG characteristics, leading to improved ESG performance overall.

Through FY2022/23 we worked with external managers on options to improve the ESG profile of multi-factor equity mandates. These mandates (approximately 19% of AUM) are systematically managed to enhance financial performance by overweighting investments in factors such as value and quality. After significant analysis, we decided to change the investment universe to the MSCI World (or equivalent) from the previous MSCI World IMI universe, reducing the number of constituents by about two thirds while still providing strong exposure to desired factors.

We adopted the MSCI PAB Index as the multi-factor mandates benchmark and set out our expectations that managers design portfolios that produce ESG outcomes at least as ambitious as the PAB Index. Our analysis suggests these changes, currently being implemented, will significantly improve the ESG profile of the multi-factor portfolios without negatively affecting financial performance.

In FY2022/23 we developed an Impact Investment Framework, covering qualification, analysis, and management of Impact investments. This framework is based on global good practices for asset owners, such as the Five Dimensions of Impact and GIIN Iris+ metrics.

We worked on our definition of Impact Investments, which is: "Investments made with the intent to deliver measurable positive social and/or environmental impacts, and the Fund's required financial return." During the year, we increased the number of Impact Investments through integration across our portfolio, in addition to rolling out a dedicated new investment category, 'Sustainable Transition Opportunity'.

Outside of the RI Compass, we were active on a number of SI-related initiatives, including:

• Published our annual Climate Change Report (October 2023)

• Having signed the Paris Aligned Investor Initiative's Net Zero Asset Owners Commitment in 2021, in October 2022 we submitted a climate action plan as required under the Commitment.

• Our 2023 carbon footprint assessment reported a 59.7% reduction in emissions intensity and 98.8% reduction in potential emissions from fossil fuel reserves, compared with our 2025 targets of 40% and 80% respectively.

• Supported the development of the New Zealand Stewardship Code; became a founding signatory when it launched in September 2022. It is a principles-based framework, with reporting on a 'comply or explain' basis by 2024.

Developed a collaborative engagement programme with fellow New Zealand Crown Financial Institutions.

This involves engaging on climate change with NZX-listed top 50 companies. We issued a joint public position statement on climate change in May 2023, wrote to NZX50 Chairs and engaged with stakeholders. Engagement objectives include increasing awareness about NZ mandatory climate change standards, and communicating our expectations that companies should and align with the net zero pathway.

• Sponsored the Aotearoa New Zealand Centre for Sustainable Finance, established to support the implementation of the NZ Sustainable Finance roadmap.

Supported development of NZ's climate-related disclosures regime as a member of the External Reporting Board's advisory panel.

• Supported the Modern Slavery Leadership Advisory Panel, set up to advise Government on the development of a legislative regime on modern slavery in NZ.

• In July 2023, the NZ Superannuation Fund topped the 2023 Global SWF governance, sustainability, and resilience (GSR) charts, earning a perfect score along with three other institutions.

#### Section 3. Next steps

What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We are taking several steps to advance our commitment to responsible investment in the next two years, including:

- Continuing to implement agreed changes to the multi-factor equities portfolios, leading to an improved ESG performance of this segment of the portfolio and to help ensure it is in line with the pathway to net zero by 2050.

- Undertaking a review of the fixed income portfolio to seek opportunities to improve ESG incorporation.

The approach will be to look at additional options for ESG integration in fixed income and for carbon footprinting this part of the portfolio. We will also research options for fixed income portfolios consistent with our net zero commitment.

- Continue to develop and evolve our Impact Investment Framework and approach. The framework has a strict definition of impact.

We will continue our search for impact investments that meet our criteria, in an integrated manner through our Opportunities approach and risk budget allocation. By Opportunities, we mean categories of investment (we define an Opportunity as a feature of the investment environment that is conducive to generating positive risk-adjusted active returns). In addition to integrating consideration of impact in our analysis of Opportunities, we will reassess our existing direct investments to consider which qualify as Impact Investments.

- Develop an ESG and Impact data dashboard as the basis for reporting to the Investment Committee (IC), Board and externally over FY2023/24.

This includes mapping impact outcomes to the UN Sustainable Development Goals (SDGs).

- Investigating the feasibility of a major direct private equity investment in an offshore wind project in New Zealand, which would not only be a major generator of renewable electricity but is expected to assist with further driving the decarbonisation of the local economy.

- Reviewing our external reporting in the ESG/Impact space, with a view to deciding on the best approach to sustainability reporting for 2024.

Having signed the Aotearoa New Zealand Stewardship Code, we will produce our first Stewardship report as part of our SI reporting in 2024.

- Reviewing and revising our annual TCFD-aligned Climate Change Report to comply with the latest NZ Climate-Related Disclosure (CRD) requirements that are now mandatory for large entities in New Zealand for reporting periods that start from 1 January 2023. The NZ-CRD standards broadly reflect those more recently issued by the International Sustainability Standards Board (ISSB) under the IFRS Foundation.

We are working on CRD with our Finance team to ensure that the reporting approach is integrated into our broader financial and nonfinancial reporting protocols.

- Enhancing our external manager selection, assessment, and monitoring (SAM) approach, in respect to their ESG performance, for implementation in 2024.

- Reviewing and enhancing our approach to ESG stewardship, including voting and engagement.

- Building SI requirements and functions into our Investment Data and Analytics Programme (IDAP) to help enhance our integrated ESG data ecosystem.

- Testing application of the Taskforce for Nature-related Financial Disclosures (TNFD) Framework and tools, and further integrating nature-related risks and opportunities into our ESG incorporation, stewardship, and reporting.

- Continuing to refine our approach to including sustainable investment aspects into individual performance objectives and boosting staff training in this area. Members of the investment team are encouraged to undertake sustainable finance training.

- Supporting a five-yearly independent review of the Guardians and the NZ Super Fund in 2024.

The independent reviewer is appointed by the NZ Treasury. The review will include a focus on our responsible investment/sustainable finance approach and compliance with the SI aspects of our legislated mandate.

- Developing a partnership with local independent research institutions, including planned research on systemic ESG-related risks.

#### Section 4. Endorsement

'The Senior Leadership Statement has been prepared and/or reviewed by the undersigned and reflects our organisation-wide commitment and approach to responsible investment'.

Name

Stephen Gilmore

Position

Chief Financial Officer

Organisation's Name

New Zealand Superannuation Fund

#### ΘA

'This endorsement applies only to the Senior Leadership Statement and should not be considered an endorsement of the information reported by the above-mentioned organisation in the various modules of the Reporting Framework. The Senior Leadership Statement serves as a general overview of the above-mentioned organisation's responsible investment approach. The Senior Leadership Statement does not constitute advice and should not be relied upon as such. Further, it is not a substitute for the skill, judgement and experience of any third parties, their management, employees, advisors and/or clients when making investment and other business decisions'.

### **ESG IN OTHER ASSET CLASSES**

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
OO 15	CORE	00 11, 00 12– 14	N/A	PUBLIC	ESG in other asset classes	1

#### Describe how your organisation incorporates ESG factors into the following asset classes.

Internally managed

(A) Forestry

We integrate ESG responsibilities through our governance role as a director on the Board. We also specify specific legal clauses in the mandate outlining ESG due diligence and post investment reporting. At times, we also visit sites in person to review their ESG practices. Forest Stewardship Council (FSC) represents the best practice standard we maintain.

#### (C) Other

Other equates to FX, Tilts, Synthetics and market neutral positions: Exclusions including both ethical and climate related, apply where appropriate. In addition, we have shorted excluded companies which fall into the large market capitalization category.

#### Externally managed

(D) Forestry

ESG policies, practices and capabilities are part of the external manager selection and due diligence processes. Typically, Forest Stewardship Council (FSC) certification, or equivalent PEFC, is expected.

Once a manager is selected, clauses requiring ESG requirements are brought into mandates and other legal documents. As part of our post investment monitoring, we carry out 1-2 yearly ESG reviews of our managers and ESG performance of associated companies. The objective of the review is to assess and gain more awareness of the manager/investee companies' management of ESG issues and request improvements where appropriate. Managers are rated on ESG practices. The results of the review are integrated into our annual manager conviction review.

#### (E) Farmland

ESG policies, practices and capabilities are part of the external manager selection and due diligence processes. Once a manager is selected, clauses requiring ESG requirements are brought into mandates and other legal documents. As part of our post investment monitoring, we carry out 1-2 yearly ESG reviews of our managers and ESG performance of associated companies. The objective of the review is to assess and gain more awareness of the manager/investee companies' management of ESG issues and request improvements where appropriate. Managers are rated on ESG practices. The results of the review are integrated into our annual manager conviction review.

#### (F) Other

Exclusions including both ethical and climate related, apply where feasible and appropriate. In addition, we have shorted excluded companies which fall into the large market capitalization category.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 4	PLUS	PGS 1	N/A	PUBLIC	Responsible investment policy elements	1-6

Does your formal responsible investment policy(ies) identify a link between your responsible investment activities and your fiduciary duties or equivalent obligations?

(A) Yes

Elaborate:

The Guardians' long-standing commitment to Responsible Investment (RI) is informed by our statutory mandate and our policies identify the linkages with the mandate. The New Zealand Superannuation and Retirement Income Act 2001 established the Guardians of New Zealand Superannuation and the New Zealand Superannuation Fund. The Act states that the Guardians are responsible for investing the Fund and must invest the Fund on a prudent, commercial basis and, in doing so, must manage and administer the Fund in a manner consistent with—

(a) best-practice portfolio management; and

(b) maximising return without undue risk to the Fund as a whole; and

(c) avoiding prejudice to New Zealand's reputation as a responsible member of the world community.

The Guardians is required to have a statement of investment policies, standards, and procedures, which must cover (but are not limited to) those set out in Section 61. These include (in Section 61(d)) "ethical investment, including policies, standards, or procedures for avoiding prejudice to New Zealand's reputation as a responsible member of the world community". Section 61 also refers to the retention, exercise or delegation of voting rights acquired through investments.

Our Statement of Investment Policies, Standards and Procedures (SIPSP), has a policy on Sustainable Investment which sets out our approach.

It says "Sustainable investment is understood internationally to include integrating environmental, social and governance (ESG) considerations, including climate change, into investment management. When we refer to the term "sustainable investment" we see it as encompassing ethical investment as required under Section 61 (d). Our own approach to sustainable investment is intended to be consistent with managing and administering the Fund in a manner consistent with avoiding prejudice to New Zealand's reputation as a responsible member of the world community." The SI policy and our Sustainable Investment Framework also address the retention, exercise and delegation of voting rights.

One of our key investment beliefs is that 'environmental, social and governance considerations, including climate change, are fundamental to long-term risk and return.' As a long-term investor, we are committed to active ownership and the promotion of good governance for the overall health of the capital markets.

In 2020 we started a review of our approach to RI, with a view to preparing for emerging best practice. This included a legal review of the requirements of the statutory mandate, during which the Guardians' Board confirmed that three "legs" of the mandate are of equal weight. As a result of the review, the Board approved the adoption of a sustainable finance strategy with the goal of incorporating sustainability considerations into investment decision-making and supporting the development of a sustainable financial system within the context of our legislative purpose and mandate.

In addition, under our statutory mandate there is a five-yearly independent review of the Guardians and the Fund, with the external reviewers being appointed by The Treasury.

The last review was in 2019 and the next will be in 2024. The terms of reference for the review include our approach to responsible investment and compliance with the requirements of the SIPSP.

#### Which elements are covered in your organisation's policy(ies) or guidelines on stewardship?

#### (A) Overall stewardship objectives

(B) Prioritisation of specific ESG factors to be advanced via stewardship activities

☑ (C) Criteria used by our organisation to prioritise the investees, policy makers, key stakeholders, or other entities on which to focus our stewardship efforts

(D) How different stewardship tools and activities are used across the organisation

(E) Approach to escalation in stewardship

(F) Approach to collaboration in stewardship

**G** (G) Conflicts of interest related to stewardship

 $\Box$  (H) How stewardship efforts and results are communicated across the organisation to feed into investment decision-making and vice versa

#### ☑ (I) Other

Specify:

We have a number of implementation-oriented documents that support our active ownership/active ownership policies and approaches. These documents cover, for example, requirements of engagement and voting service providers, reporting on ownership activities and how we prioritise our ownership activities. Our Communications Policy acknowledges that transparency is critical to maintaining organisational credibility and stakeholder confidence in the Guardians and Fund. We aim to keep our stakeholders as informed as possible about what we do and why we do it, and have adopted an organisational approach of being as transparent as possible about our investments, stewardship activities and our organisation in general. For example, we publish a list of our holdings on our external website as at end June and end December each year and we disclose the provider of the provider and the phaseral approaches the provider and end becember and we disclose the provider and the phaseral approaches the phaserand approac

our external managers. We have a voting dashboard on our website, which means that stakeholders can look at voting decisions at a company level.

Additional information on our active ownership activities can be found in our Annual Report and on our website here: https://nzsuperfund.nz/how-we-invest/sustainable-finance/

Institutional Shareholder Services (ISS) provides us with the platform for executing voting.

Columbia Threadneedle Investment is our engagement service provider (Responsible Engagement Overlay service, reo®). Their approach to engagement is based on constructive and confidential company dialogue and on building a relationship of trust, where, over time, they seek to gain a sound understanding of how companies manage the key ESG issues linked to their activities. The reo® service encourages improvement in ESG management should they deem existing practices insufficient to respond to ESG risks and/or opportunities.

Does your organisation have governance processes or structures to ensure that your overall political engagement is aligned with your commitment to the principles of PRI, including any political engagement conducted by third parties on your behalf?

### (A) Yes

Describe how you do this:

The Guardians take the view that engagement in public policy on matters relevant to the Fund is part of our work as an independent investment institution. In this work, we are guided by our Statement of Investment Policies, Standards and Procedures (SIPSP) – and organisational policies on Sustainable Investment, communications, government relations and codes of conduct. We are also guided by a specific Communications and Engagement Policy. This document sets out the guiding principles for engagement in public policy and detailed procedures to manage the process. They cover Government relations, media relations, media and speaking invitations, and policy submissions.

These policies are published on our external website.

In essence, the Guardians has operational independence from the NZ Government, ensuring investments are free to be made on a prudent, commercial basis in line with our SIPSP and SI Framework. However, we do receive/respond to an annual 'Letter of Expectations' from the Minister of Finance as a formal (but not legislative) avenue for policy dialogue for the coming year. This provides an opportunity for the Guardians' Board to consider the Minister's expectations in the course of developing the Guardians' annual Statement of Intent (SoI) and Statement of Performance Expectations (SPE).

These documents are also published on our external website. As an operationally independent Crown entity, and consistent with our role as an institutional investor, the Guardians is actively engaged on various matters with a public policy dimension, both in New Zealand and internationally. In commenting on public policy issues, we adhere to a strict policy of political neutrality.

Our contributions on public policy matters are usually made as part of a public submission process and the Minister's office and Treasury are provided with advance copies of these submissions, in line with our 'No Surprises' protocol.

As a matter of Guardians' policy, all our submissions are publicly available on our website at

https://www.nzsuperfund.nz/publications/submissions. We believe that having a public 'voice' and advocating on SI matters is consistent with best practice portfolio management, our independence and our commitment to transparency and good stewardship. It is also required under our obligations as a responsible investor and signatory of the PRI. Transparency is critical to maintaining organisational credibility and stakeholder confidence in the Guardians and Fund. We aim to keep our stakeholders informed about what we do, why we do it and have adopted an organisational approach of being as transparent as possible about our investment decisions and our organisation in general.

Finally, the Guardians has demonstrated domestic leadership in helping to advance both the New Zealand Corporate Governance Forum and the NZ Sustainable Finance Forum. We also provide SI advice to other Crown Finance Institutions and work closely with them on issues such as public policy, ESG exclusions and corporate engagements.

We have a clear internal process for engagement with political and business stakeholders, guided by the Communications and Engagement Policy and Procedures that covers these activities, including speaking invitations, meetings with any political groups, interactions with lobby groups, memberships of peer organisations, presentations, media relations and a process for deciding what we should make submissions on, as well as for approving submissions.

The Head of Communications is responsible for these activities and for the implementation of the Communications and Engagement Policy and Procedures. The Sustainable Investment and the Communications teams meet regularly to monitor and discuss activities. We have specifically addressed what we consider to be appropriate for political engagement conducted by third parties on our behalf. We publish any submissions we make on Government policy developments on our external website. We also make regular reports (annual) to the Finance & Expenditure Select Committee, which include comprehensive disclosures about conflict disclosures and memberships. Our reports to the Select Committee are available on our website.

• (B) No

• (C) Not applicable, our organisation does not conduct any form of political engagement directly or through any third parties

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle

## In your organisation, which internal or external roles are responsible for implementing your approach to responsible investment?

## ☑ (A) Internal role(s)

Specify:

Primary responsibility for implementing our Sustainable Investment (SI) approach sits with the Head of Sustainable Investment and the SI team. However, the CEO, CIO and Leadership Team all have responsibility for implementation because Sustainable Investment is embedded in the organisation's purpose. SI is integrated through our investment decision processes, including portfolio design (opportunity definition and risk budget allocation), due diligence (new investments) and portfolio monitoring.

## (B) External investment managers, service providers, or other external partners or suppliers Specify:

We use external service providers to provide operational support for our SI approach. These include Columbia Threadneedle's Responsible Engagement Overlay service for engagement with global equities and Institutional Shareholder Services to execute proxy voting on our holdings, in line with our voting policy. We use MSCI for ESG ratings data. We also use external service providers for operational support in due diligence, portfolio carbon footprinting, research and assurance.

• (C) We do not have any internal or external roles with responsibility for implementing responsible investment

## Does your organisation use responsible investment KPIs to evaluate the performance of your board members, trustees, or equivalent?

## (A) Yes, we use responsible investment KPIs to evaluate the performance of our board members, trustees, or equivalent

Describe: (Voluntary)

The Board sets out performance measures for the Guardians and the NZ Super Fund in its five-yearly Statement of Intent (Sol). The current Statement of Intent for the period 1 July 2022 to 20 June 2027 sets out measures in respect of best practice and Sustainable Finance. In the context of best practice, the measure is to achieve an A or A+ rating (or the equivalent) for Strategy and Governance in the annual PRI assessment, to report on performance and activities against the six principles of the PRI and the exercise of voting rights across the Fund's segregated equity portfolio. The best practice section also includes a requirement to report annually on adherence to the Santiago Principles (with third-Party assurance) and to achieve top quartile or higher rates in the Geoeconomica Index of sovereign wealth fund compliance with the Santiago Principles. The measures in the Sustainable Finance section are to achieve the carbon reduction targets set out in the Fund's Climate Change Investment Strategy and to publish an annual Climate Change Report, including a Climate Change Action Plan as required by the Net Zero Asset Owners Commitment.

• (B) No, we do not use responsible investment KPIs to evaluate the performance of our board members, trustees, or equivalent

Does your organisation use responsible investment KPIs to evaluate the performance of your senior executive-level staff (or equivalent), and are these KPIs linked to compensation?

(A) Yes, we use responsible investment KPIs to evaluate the performance of our senior executive-level staff (or equivalent)

Indicate whether these responsible investment KPIs are linked to compensation

• (1) KPIs are linked to compensation

• (2) KPIs are not linked to compensation as these roles do not have variable compensation

 $\circ$  (3) KPIs are not linked to compensation even though these roles have variable compensation

Describe: (Voluntary)

The Guardians has a discretionary incentive scheme as part of our remuneration structure. Our Statement of Intent (Sol) sets out the KPIs determined by the Guardians' Board. These include specific KPIs in respect of responsible investment best practice, the Climate Change Investment Strategy (carbon reduction targets) and reporting required for our Net Zero Asset Owners Commitment. The Board also produces an annual Statement of Performance Expectations (SPE) which sets out expectations about performance and the completion of strategic priorities. The SPE for 2022/23 included Resetting the Responsible Investment Compass as one of the strategic priorities for that year, with specific activities identified for completion. The KPIs set out in the Sol and SPE are rolled out to the relevant individual KPIs for members of the senior team. Achievement of these KPIs is a determining factor in the decisions about whether bonuses may be paid and the quantum. In making decisions about staff bonuses, the Guardians' Board determines the degree to which we have met KPIs.

• (B) No, we do not use responsible investment KPIs to evaluate the performance of our senior executive-level staff (or equivalent)

PGS 23 PLUS OO 5, OO 8, N/A PUBLIC Stewardship: Overall stewardship strategy 2	
--	--

How does your organisation, or the external service providers or external managers acting on your behalf, prioritise the investees or other entities on which to focus its stewardship efforts?

By stewardship we mean that we are an active owner of the assets we invest in. We exercise stewardship in respect of assets we hold directly, in companies we invest in via listed equities and through the exercise of voting rights. We also contribute to the development of public policy in relevant areas. For example, we actively supported the development of a Stewardship Code for New Zealand and we were a founding signatory in 2022.

Where we have investments that we hold directly, for example in rural land and forestry in New Zealand, we use our influence as an owner or investor to ensure that they understand best practice ESG approaches for their business or sector, including how they manage, monitor and report on ESG risks, and work to address relevant issues.

We also encourage them to ensure they are monitoring the impact of systemic issues, such as climate change and any developing systemic issues.

For global listed equities, we use a portfolio monitoring service to identify companies that have breached – or might breach – recognised ESG standards. We regularly monitor the ESG ratings of the companies in our listed portfolios. Where issues arise, we assess the available information, along with data from other sources, to determine whether we should include the company in our engagement programme. We join collaborative engagement initiatives, or we may engage directly with companies. In our engagement activities, we have identified severe environmental damage (including climate change), human rights, and bribery and corruption as priority issues for engagement.

One of the key factors we consider when prioritising our engagement efforts is whether the breach is of international standards or represents a high/significant ESG risk, i.e. if it is: long-term or short-term; historic or ongoing; isolated or endemic; a potential reputation risk internationally or nationally.

Other factors we take into account include our ability to participate in collaborative engagements through international initiatives, our ability to engage directly with the company, the potential effectiveness of engagement and the resources required. We support a number of global collaborative engagement initiatives.

We have a resource-sharing agreement with fellow New Zealand Crown Financial Institutions (CFIs), the Accident Compensation Corporation (ACC), the Government Superannuation Fund Authority and the National Provident Fund.

We often work together on engagement initiatives, although the Guardians will also undertake our own engagements. For example, we led a global engagement on social media (completed in 2021). Last year, the CFIs as a group developed an initiative to engage on climate change with companies listed on the NZX50. The initiative was launched in 2023 and is ongoing.

The CFI group has appointed Columbia Threadneedle Investments (CTI) to provide responsible engagement services for our global equity holdings.

CTI engages on behalf of clients with more than US\$1 trillion in assets under management globally. The additional resource provided by the responsible engagement service increases the reach and effectiveness of our global engagement. As well as engaging with companies on individual issues, it carries out thematic and industry-wide engagements on topics such as human rights, work rights, climate change and environmental harm.

We have some active mandates where we invest in equities via an external manager. In this case, we exercise our stewardship by including ESG clauses in the legal agreement where possible.

Voting: We exercise voting rights on all shares we own. This includes shares in portfolios managed by external managers. This ensures that votes for all shares we hold are voted for in a consistent way, according to our voting policy. Operationally, we have a proxy voting service provider (ISS) who is responsible for executing voting.

We have the ability to vote manually within that system and we do vote manually in respect of shares in our domestic market or where we opt to. Our custom voting policy is based on ISS policies, but we have included more stringent ISS policies in respect of aspects such as Director independence, Board tenure, alignment of pay and performance, climate change and ESG. Our voting policies are based on good corporate governance principles. We report on our voting activities publicly via a dashboard on our external website. For our overseas holdings we generally direct our elected proxy voting agency to vote in line with our customised global voting policy.

We retain the right to instruct voting decisions on the shares we own. For our New Zealand equity holdings, we instruct our voting directly. We consider the recommendations of both our proxy voting agency and our New Zealand investment managers.

We may withhold or recall shares from loan to exercise our voting rights to support our governance and engagement policies.

Which of the following best describes your organisation's default position, or the position of the external service providers or external managers acting on your behalf, concerning collaborative stewardship efforts?

## (A) We recognise the value of collective action, and as a result, we prioritise collaborative stewardship efforts

wherever possible

• (B) We collaborate on a case-by-case basis

• (C) Other

• (D) We do not join collaborative stewardship efforts

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 24.1	PLUS	OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

# Elaborate on your organisation's default position on collaborative stewardship, or the position of the external service providers or external investment managers acting on your behalf, including any other details on your overall approach to collaboration.

We consider that collaborative stewardship is an important way to achieve improvement in the management of ESG risks and achieving sustainability outcomes. As a result of engagement programmes by the Guardians and other investors around the world, companies are increasingly aware that investors are analysing their ESG performance and expecting them to address ESG issues responsibly. We believe collaborative stewardship is important because, although we are a large investor in the New Zealand context, we are small by global standards. As an individual investor, we generally own a very small number of an issuer's securities. Our ability to achieve change or improvement in ESG is therefore enhanced when we work with other investors and peers, because of the larger ownership base represented and the increased resources available.

When working collaboratively, we are mindful of the need to adhere to all applicable legal and regulatory requirements that might apply (such as competition or anti-trust requirements).

In NZ, we have an ongoing collaborative and resource sharing arrangement on Responsible Investment with fellow NZ Crown Financial Institutions (CFIs) the Accident Compensation Corporation (ACC) and the Government Superannuation Fund Authority and National Provident Fund. We have together appointed Columbia Threadneedle Investments (CTI) to provide responsible engagement services (REO) for our global equities holdings.

The additional resource provided by the responsible engagement service increases the reach and effectiveness of our global engagement. CTI's REO service engages on behalf of clients with more than US\$1 trillion in assets under management globally. CTI reviews its engagement policy annually. Its policy says the preferred approach to conducting engagement is to use constructive, confidential dialogue, typically interacting one-to one with issuers and building a relationship of trust over time as long-term investors. As well as engaging with companies on individual issues, REO carries out thematic and industry-wide engagements on topics such as human rights, work rights, climate change and environmental harm.

As a client we have an opportunity each year to provide input on decisions around REO's priority companies and themes. We publish REO engagement reports on our external website on a quarterly basis.

In the New Zealand market, CFIs have a collaborative engagement on climate change with companies in the NZX50, with the objective of ensuring that local companies are addressing mandatory Climate Related Disclosure requirements, understand the need to develop a pathway for the transition to a low carbon economy and understand CFI expectations in respect of our commitment to having portfolios aligned with net zero by 2050.

We are also actively involved in other collaborative stewardship activities to address themes or systemic issues such as climate change. This enables us to keep in touch with best practice, as well as contributing to collaborative initiatives. We are a signatory to the Carbon Disclosure Project, a member of the International Corporate Governance Network, signed up to the Paris Aligned Investor Initiative Asset Owner Commitment, PRI collaborative initiatives, the Investor Group on Climate Change in Australia and New Zealand, the NZ Corporate Governance Forum and the Australian Council of Superannuation Investors (ACSI), which undertakes engagement activities in the Australian market. We are actively involved in the Transition Pathway Initiative.

 $\circ~$  (F) We do not use any of these channels

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 26	PLUS	OO 8, OO 9, PGS 1	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

## How does your organisation ensure that its policy on stewardship is implemented by the external service providers to which you have delegated stewardship activities?

## (A) Example(s) of measures taken when selecting external service providers:

We follow the requirements set out in our Procurement and Outsourcing Policy. In certain circumstances, we will be required to follow Government procurement practices, which may include a Government Electronic Tendering process. Where the Government process does not apply, we have our own processes for major and minor contracts. A major contract is where the following factors are considered to be potentially significant to our organisation:

- The impact of a supplier's disruption on our operations including the time to recovery of core capabilities;
- The impact the supplier could have on our reputation;
- Whether the supplier has access to restricted and confidential information or poses a significant information security risk;
- Whether the supplier's IT infrastructure pose a significant information security risk;
- · The level of difficulty and time required to find an alternative supplier

In respect of outsourcing, we consider the capability of an external party to perform the outsourced process, cost benefit analysis, risks around outsourcing, efficiency and whether it is consistent with best practice.

Selection criteria include the organisation's specialisation, reputation, support by the industry sector, internal controls, information delivery, environmental track record, location and organisational culture.

For large contracts, a panel of Guardians' team members may be assembled to make the section. We undertake appropriate due diligence and legal checks. We have a specific process for developing the outsourcing contract.

Requirements for the ongoing monitoring of the relationship is set out in our Third Party Monitoring Framework and Process. Regular reviews are required (usually every three years).

## ☑ (B) Example(s) of measures taken when designing engagement mandates and/or consultancy agreements for external service providers:

The risk factor we will consider when designing engagement mandates include:

- IT Security Practices: We should understand the maturity of the third party's policies, standards and procedures for IT security including whether they have any IT security assurance programme, and whether independent assurance is obtained over security controls.

- Data- Access/ Storing/ Confidentiality

- Data Protection: Evaluate the adequacy of the various technical controls applied to protect our data third party's on systems.
- Privacy: Examine the conformance of the third party's privacy practices with good practice privacy principles.
- Business Continuity: Enquire on the various processes by which the third parties ensure they can recover from an interruption or disaster event, including backups, geographical separation of data storage, and recovery plans.

- Financial Strength: Assess the financial strength of the third party and determine whether there are any risks to the financial viability of the third party which may impact on their ability to fulfil their contracted services and service levels.

- Staff/contractor Vetting: Assess the third party's procedures for the vetting of staff and contractors (such as criminal history checks), and evaluate whether staff and contractors receive adequate training on information security.

- Supply chain: Determine how the third party's ensure that their own outsourced providers and contractors are meeting security and service continuity expectations.

Where we need to meet legal or regulatory obligations, determine whether the third party operates in a manner which enables us to meet our obligations.

Examples include: Privacy, Bribery & Corruption, Anti-money laundering, Health and Safety, Public records Environmental Social & Governance (ESG): Determine whether the third party operates in a manner consistent with our expectations in regard to ESG e.g. Bribery & corruption, climate change, modern slavery.

### (C) Example(s) of measures taken when monitoring the stewardship activities of external service providers:

Our Responsible Engagement Overlay (REO) service provider provides us with quarterly reports, including a public report, a confidential report, detailed breakdowns of the data behind the reports, annual data, access to an online portal. We have quarterly meetings with the REO specialist. We are able to request specific information or analysis. We do Third Party Monitoring reviews. The most recent was completed in 2022.

PGS 30	CORE	00 9	N/A	PUBLIC	Stewardship: (Proxy) voting	2

### How is voting addressed in your securities lending programme?

• (A) We recall all securities for voting on all ballot items

(B) When a vote is deemed important according to pre-established criteria (e.g. high stake in the company), we recall

all our securities for voting

Provide details on these criteria:

In 2017, the Guardians approved a Securities Lending mandate. At that time, our Statement of Investment Policies, Statements and Procedures (SIPSP) and (then) Responsible Investment Framework were amended to address voting. The Sustainable Investment Framework states that if we lend securities:

- We will retain our rights to withhold or recall shares to exercise our voting rights.

- We will maintain guidance on when to withhold or recall shares.

- We will work with our securities lending agents to encourage good practice standards by borrowers including not borrowing for the primary purpose of voting.

- We will maintain guidelines for circumstances under which we may withhold or recall shares from loan to exercise our full voting rights.

- We monitor securities lending and retain a minimum holding of shares in each company on loan.

The criteria for recalling shares are set out below, with the reason in each case:

- Holdings over 0.5% -- Significant ownership levels

- Companies on our Engagement Focus List -- The Guardians or REO (engagement service provider) are currently engaging with these companies because of serious breaches of ESG standards. It is important to retain and exercise our full voting right.

- Companies in the MCO Infrastructure Fund -- MCO is a NZ manager with a small concentrated portfolio. It is important to retain and exercise our full voting right on these holdings.

- Contentious M&A -- It is important to retain and exercise our full voting right when meetings are held to decide on contentious M&A outcomes.

- Climate change resolutions -- From 1 Jan 2019, the criteria for recall was extended to include company meetings with climate change related resolutions on the agenda.

- (C) Other
- (D) We do not recall our securities for voting purposes
- $\circ~$  (E) Not applicable; we do not have a securities lending programme

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle

For the majority of votes cast over which you have discretion to vote, which of the following best describes your decision making approach regarding shareholder resolutions (or that of your external service provider(s) if decision making is delegated to them)?

(A) We vote in favour of resolutions expected to advance progress on our stewardship priorities, including affirming a company's good practice or prior commitment

• (B) We vote in favour of resolutions expected to advance progress on our stewardship priorities, but only if the investee company has not already publicly committed to the action(s) requested in the proposal

- $\circ$  (C) We vote in favour of shareholder resolutions only as an escalation measure
- $\circ~$  (D) We vote in favour of the investee company management's recommendations by default

 $\circ$  (E) Not applicable; we do not vote on shareholder resolutions

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 32	CORE	00 9	N/A	PUBLIC	Stewardship: (Proxy) voting	2

## During the reporting year, how did your organisation, or your external service provider(s), pre-declare voting intentions prior to voting in annual general meetings (AGMs) or extraordinary general meetings (EGMs)?

□ (A) We pre-declared our voting intentions publicly through the PRI's vote declaration system on the Resolution Database

□ (B) We pre-declared our voting intentions publicly by other means, e.g. through our website

C) We privately communicated our voting decision to investee companies prior to the AGM/EGM

• (D) We did not privately or publicly communicate our voting intentions prior to the AGM/EGM

 $\circ$  (E) Not applicable; we did not cast any (proxy) votes during the reporting year

How does your organisation ensure vote confirmation, i.e. that your votes have been cast and counted correctly?

We have full access to our voting via the ISS Platform and can see confirmations by ballot, and rejections if any. In any case in which we are unsure if votes have been cast and counted correctly, we are able to communicate with our proxy voting service provider (ISS) by email or phone to clarify the situation.

Our custodian is also able to advise our Investment Operations team when there is an issue with voting. In July and August 2023 our Internal Audit team undertook an internal audit of our proxy voting process. It found that process established a sound platform for managing and operating the voting processes and they were largely operating effectively.

## STEWARDSHIP: ENGAGEMENT WITH POLICY MAKERS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 39	CORE	OO 8, OO 9	PGS 39.1, PGS 39.2	PUBLIC	Stewardship: Engagement with policy makers	2

Did your organisation, or the external investment managers or service providers acting on your behalf, engage with policy makers as part of your responsible investment approach during the reporting year?

(A) Yes, we engaged with policy makers directly

(B) Yes, we engaged with policy makers through the leadership of or active participation in working groups or collaborative initiatives, including via the PRI

C) Yes, we were members of, supported, or were in another way affiliated with third party organisations, including trade associations and non-profit organisations, that engage with policy makers, excluding the PRI

• (D) We did not engage with policy makers directly or indirectly during the reporting year beyond our membership in the PRI

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 39.1	CORE	PGS 39	N/A	PUBLIC	Stewardship: Engagement with policy makers	2

During the reporting year, what methods did you, or the external investment managers or service providers acting on your behalf, use to engage with policy makers as part of your responsible investment approach?

- ☑ (A) We participated in 'sign-on' letters
- (B) We responded to policy consultations

 $\blacksquare$  (C) We provided technical input via government- or regulator-backed working groups

Describe:

A senior member of the Sustainable Investment team is a member of the New Zealand External Reporting Board's advisory panel on developing Climate Related Disclosure standards. The CRD standards were released in December 2022. In 2022, the Head of Sustainable Investment took part in the NZ Government-led Leadership Advisory Group on modern slavery.

In 2022/23, a senior member of the Sustainable Investment team took part in the Nature Working Group set up by the Responsible Investment Association of Australasia (RIAA).

### (D) We engaged policy makers on our own initiative

Describe:

We made submissions to the draft proposals on Modern Slavery and Climate Related Disclosures. Submissions are publicly available on our external website.

### (E) Other methods

Describe:

We held stakeholder briefings in Wellington and Auckland that included commentary on relevant policy areas, such as climate change.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle

  - $\Box$  (3) Private equity
  - $\Box$  (4) Real estate
  - □ (5) Infrastructure
  - $\Box$  (6) Hedge funds

 $\Box$  (7) Forestry  $\Box$  (8) Farmland

 $\Box$  (9) Other

(4) Description of the activity and what was achieved. For collaborative activities, provide detail on your individual contribution.

During calendar 2022, the Guardians has been developing a collaborative initiative on climate change with the NZ Crown Financial Institutions (CFIs). The engagement will focus on companies listed on the NZX50. The CFIs are the Accident Compensation Corporation, Government Superannuation Fund Authority, National Provident Fund and the NZ Superannuation Fund (managed by the Guardians.)

Background - The New Zealand Government has committed to net zero by 2050 and has introduced mandatory climate reporting for large companies and financial institutions. The External Reporting Board (XRB) was tasked to develop Climate Related Disclosure (CRD) standards, which were released by the in December 2022.

The Financial Markets Authority (FMA) has responsibility for the independent monitoring and enforcement of the regime. In October 2021, in response to the release of the Crown Responsible Investment Framework, CFIs committed to align their investment portfolios with a net zero emissions economy by 2050 or sooner. They also joined the Net Zero Asset Owners Commitment.

Under the Crown RI Framework, the CFIs are required to address climate change by ensuring transparent reporting of emissions intensity of investment portfolios, investing in climate solutions, using collective influence as asset owners to engage with companies on climate change and emissions reductions, with the objective that all assets in their investment portfolios achieve net zero by 2050 or sooner.

During 2022, CFIs developed a plan to engage on climate change with companies listed on the NZX50. In terms of the timing, it was agreed that the initiative should be launched after the XRB had completed its work on the CRD standards, which meant the engagement would get under way in 2023.

The key elements of the engagement plan developed in 2022 included a CFI joint position statement which has been published on each of our external websites, drafting a letter to the Chairs of companies listed on the NZX50 drawing attention to the CFI position statement and planning engagement with key stakeholder groups and business organisations.

In 2022, we also developed the objectives for the engagement.

These were to: understand companies' progress on climate change awareness, capability and commitments; understand how they are meeting regulatory requirements on climate-related disclosures and reporting; support companies to prepare for the transition by sharing knowledge of climate change risks and opportunities from the institutional investor perspective; understand how companies' plans will align with our net zero commitments over time.

We also prepared background materials to support the engagement and communication with stakeholders. The engagement started in May 2023.

(B) Example 2:

## **CLIMATE CHANGE**

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41	CORE	N/A	PGS 41.1	PUBLIC	Climate change	General

Has your organisation identified climate-related risks and opportunities affecting your investments?

☑ (A) Yes, within our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

Climate change presents risks for which we will not be rewarded. It is considered good practice to remove uncompensated portfolio risks. These risks have multiple drivers across technological change, resource and physical impacts, and policy actions - and will affect listed and unlisted assets in different ways. Whilst the necessary shift to a low carbon energy system will affect all sectors, different climate-related risks will have differing impacts over a range of asset types, planning horizons and scenarios, depending on the path taken.

We have identified the following immediate/short-term risks arising from our current five-year Asset Allocation planning cycle (subject to annual review):

- the supply and demand changes from substitution, higher cost structures, consumer preference and regulation;
- increasing prevalence of litigation in relation to perceived action or inaction on climate change;
- physical damage or disruption to industries and economies; and
- inability to adapt at reasonable cost over a reasonable period.

### (B) Yes, beyond our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

Given the NZ Super Fund's long-term horizon (peaking in the 2070s), we have made it a priority to consider how the Fund's investment strategies, portfolio and the companies we invest in, should respond to the risks and opportunities stemming from climate change. We have adapted our ownership practices and investment decision-making framework to explicitly account for climate change investment risk in our models through a custom Climate Change Valuation Framework. Our Framework has since been adapted by the Accounting for Sustainability (A4S) group as the basis for their Essential Guide to Valuations and Climate Change (https://www.accountingforsustainability.org/valuations.html).

Through this Framework, we integrate material and quantifiable climate-related risks and opportunities into our valuation model via three methods: adjusting cash flows (revenue, costs, capital expenditure) during the forecast period; adjusting the terminal value; and adjusting the discount rate to reflect that any reduction in certainties due to perceived climate-related risk.

This valuation, along with the qualitative commentary, is reviewed by our Investment Committee and influences whether or not we buy, hold or sell the asset. When we do acquire an asset, we own the asset actively, monitoring business performance against climate change standards and metrics, and periodically reviewing climate change impact analysis.

• (C) No, we have not identified climate-related risks and/or opportunities affecting our investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41.1	CORE	PGS 41	N/A	PUBLIC	Climate change	General

## Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

• (A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

As an asset owner, climate change will have an impact on the Fund's assets in a range of different ways. Climate change presents risks for which we will not be rewarded. It is considered good practice to remove uncompensated portfolio risks. These risks have multiple drivers across technological change, resource and physical impacts and policy actions. They affect both listed and unlisted assets, but may impact them in different ways.

Transition risks will decrease the attractiveness of carbon intensive assets and the value of fossil fuel reserves – meaning some of the assets we invest in might become obsolete, whilst low carbon intensity assets may increase in relative attractiveness. Our Climate Change Investment Strategy has four elements: Reduce; Analyse, Engage and Search. The Reduce element involves measuring our carbon foot print and targeting a reduced exposure to carbon relative to our Reference Portfolio (benchmark). The Analyse research has identified that our climate related risk exposure is concentrated in a few sectors (utilities, materials and energy), with a wide geographic spread and predominantly in our global listed equities holdings.

To date, we have achieved the Fund-wide targets primarily by adjusting holdings in the Fund's global equity portfolio. This has involved applying a bespoke carbon methodology to our passive equity holdings. We applied a carbon short swap to neutralise our exposure to any companies with high carbon reserves that we incidentally take a position in, for example, when we use an index derivative to complete our passive equity exposure. We also ask our external investment managers who manage quantitative multi-factor strategies on our behalf, to meet our carbon targets, but give them flexibility in how they do this.

In 2017, we undertook a review of the physical risk exposure of the Fund's real assets. The report drew heavily on the International Panel on Climate Change (IPCC) and Fifth Assessment Report.

Our findings highlighted the different kinds of risks that our physical assets were exposed to. This review considered both the inherent risk to the asset and the level of exposure the Fund has to that asset. It identified investments that presented the greatest direct physical climate-related risk to the Fund as: 1. Timber; 2.New Zealand rural land (dairy); 3. Toll roads.

In light of that 2017 review of physical risk exposure, and the Climate Change Investment Strategy more broadly, we have adapted our investment decision making framework to explicitly account for climate change investment risk in our valuation models. The framework aims to provide a structured approach to identifying climate change considerations that could affect an investment. It guides the investment professional through filtering climate change considerations into those assumptions that have enough significance to be modelled in valuations and provides a common framework to ensure greater consistency across teams and time. The assumptions are then integrated into our existing investment processes.

In 2017, we also undertook a review of the physical risk exposure of the Fund's real assets, drawing on the IPCC and Fifth Assessment Report.

Our findings highlighted the different kinds of risks that our physical assets were exposed to. This review considered both the inherent risk to the asset and the level of exposure the Fund has to that asset. It identified investments that presented the greatest indirect physical climate-related risk to the Fund as: 1. Retirement/aged care; and 2. Banking.

Our Analyse research highlighted a number of opportunities our sectors/assets may be exposed to by 2100 under 2°C, 3°C and 4°C scenarios.

This review considered both the inherent benefits to the asset and the level of exposure the Fund has to that sector/asset. We identified investments presenting the greatest climate-related benefits to the Fund under a range of climate scenarios, as : 1. New Zealand Timber, and potentially some overseas timber assets; 2. Agriculture; 3. Industrials; 4. Waste management.

We manage risk for our listed equity holdings by reducing our exposure to carbon intensive investments and those with high carbon reserves.

We manage risk exposure for our direct investments by means of our valuation framework and through our governance oversight. We have a Sustainable Transition opportunity (area of focus) which has led us to seek and assess prospects in energy efficiency, transformational infrastructure, transport, resource and land management. The Fund has made a number of climate impact investments over recent years, including wind and solar generation in the U.S. and Europe, energy efficiency and waste management opportunities.

• (B) No, our organisation has not yet integrated climate-related risks and opportunities into its investment strategy, financial planning and (if relevant) products

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 43	CORE	N/A	N/A	PUBLIC	Climate change	General

## Has your organisation assessed the resilience of its investment strategy in different climate scenarios, including one in which the average temperature rise is held to below 2 degrees Celsius (preferably to 1.5 degrees Celsius) above preindustrial levels?

□ (A) Yes, using the Inevitable Policy Response Forecast Policy Scenario (FPS) or Required Policy Scenario (RPS)

 $\Box$  (B) Yes, using the One Earth Climate Model scenario

□ (C) Yes, using the International Energy Agency (IEA) Net Zero scenario

☑ (D) Yes, using other scenarios

Specify:

In 2022, we assessed the resilience of our passively held global equities portfolio (~40% AUM) against a 1.5 degrees Celsius / netzero-aligned world by 2050 scenarios (SSP1-RCP1.9, IPCC), sourced from a range of ESG data service providers. Ultimately, we opted to adopt the MSCI World Climate Paris Aligned Index and the MSCI EM Climate Paris Aligned Index as the two building blocks for the global equity component of our Reference Portfolio benchmark.

• (E) No, we have not assessed the resilience of our investment strategy in different climate scenarios, including one that holds temperature rise to below 2 degrees

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 44	CORE	N/A	N/A	PUBLIC	Climate change	General

## Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

## (A) Yes, we have a process to identify and assess climate-related risks

(1) Describe your process

Our Climate Change Investment Strategy has four elements: Reduce, Analyse, Engage, and Search which together act to identify, assess and manage climate-related risks and opportunities.

The aim of Analyse is to integrate climate change into our investment analysis and decision-making. This includes incorporating identification and assessment of climate change risks and opportunities into the pre-investment due diligence that we undertake for areas of the Fund's portfolio in which we have more concentrated positions.

Our analysis framework has five steps:

1.

We identify the investee company's core activities, operating environment, financial drivers and the geographies it operates.

2. We assess the sources of climate change risks and opportunities, applying six lenses to assess how assets might be affected by the climate change transition:

- Technology - Disruption driven by the development of technology to support a low-carbon economy;

Resource availability – Slow-onset shifts in everyday environmental factors;

- Impact of physical damages - The impact of acute, extreme events linked to climate change;

 Policy – Increased costs and complexity from policies and regulations designed to limit the long-term effects of climate change and to encourage sustainability;

- Demand and supply - Changes in economic and social factors affecting demand and supply; and

- Liability - Parties who have suffered loss or damage from the effects of climate change seek compensation from those held responsible.

#### 3.

We filter the sources of climate-related risks to assess their materiality. Those considered immaterial are not factored into the valuation model but are mentioned in the qualitative commentary. For those that are material, we try to quantify their impact. Where this is possible, we include it in our model (see step four below). Where this is not possible, we identify its likely directional impact on the attractiveness of the investment.

#### 4.

We integrate the material and quantifiable climate-related risks and opportunities into our valuation model. We have three methods for this: i) adjusting cash flows (revenue, costs, capital expenditure) during the forecast period; ii) adjusting the terminal value, and; iii) adjusting the discount rate.

5. If we acquire the asset, we own it actively (see below for further details), and monitor business performance against climate change standards and metrics.

#### (2) Describe how this process is integrated into your overall risk management

We have adapted our ownership practices and investment decision-making framework to explicitly account for climate change risk in our models (where practicable) through a custom Climate Change Valuation (Analytical) Framework. Our Framework has since been adapted by the Accounting for Sustainability (A4S) group as the basis for their Essential Guide to Valuations and Climate Change (https://www.accountingforsustainability.org/valuations.html).

The Framework aims to provide a structured approach and has been updated with improved physical risk analysis. It guides the investment professional through filtering climate change considerations into those assumptions that have enough significance to be modelled in valuations and provides a common framework to ensure greater consistency across teams and time. The assumptions are then integrated into our existing investment processes.

Ultimately, responsibility for climate change risk sits with the Board. The Board delegates responsibility for management of this risk to senior leadership by ensuring the overall organisational strategy includes climate change risks and opportunities and by setting a stand-alone Climate Change Investment Strategy for the Fund. This year the Board's Audit Committee has had education sessions and discussions on the mandatory climate-related disclosure regime that has come into effect in New Zealand to ensure they understand the requirements and how the management team will address them.

Our CEO leads the delivery of our strategic objectives and has played an active role in promoting a focus on climate change across the New Zealand investment industry, particularly in his former role as co-Chair of the New Zealand Sustainable Finance Forum. Climate change responsibilities are delegated throughout the Guardians, with our Chief Investment Officer, Head of Sustainable Investment and key internal committees each playing a role in ensuring that our Climate Change Investment Strategy is implemented. Members of the Investment team are required to integrate climate change into investment decisions. They are supported by the subject-matter experts in the Sustainable Investment team.

We aim to ensure that everyone has the tools they need to deliver on our climate change objectives, by running regular education sessions and including our approach to climate change in the induction process for new employees.

#### ☑ (B) Yes, we have a process to manage climate-related risks

### (1) Describe your process

Reduce manages the transition risk of the portfolio by: measuring our carbon footprint; setting a target to reduce our portfolio's emissions intensity and our holdings of potential emissions from reserves; and applying a negative screening methodology to our equity portfolio and our benchmark.

In 2022, as part of a wider review of our responsible investment approach, the Board elected to change the ACWI IMI building block of our Reference Portfolio to the MSCI World Climate Paris Aligned Index and the MSCI EM Climate Paris Aligned Index. As well as improving the overall ESG profile of the Fund, these indices will ensure that the Fund's passive global equity positions are better aligned with net zero objectives.

The indices reduce but do not eliminate exposures to fossil fuel reserves so we continue to apply a custom negative screening overlay to achieve this goal, in line with our targets. The new indices:

- reduce the GHG emissions intensity by 50%;
- reduce the GHG emissions intensity by 10% each year until 2050;
- integrate Scope 3 emissions into targets;
- underweight companies facing high transition and physical climate risk;
- increase allocation to companies with credible emissions reduction targets;
- · increase exposure to green revenue; and
- overweight companies providing climate solutions.

The Engage element of the Strategy aims to improve the reporting and management of climate-related risks by the companies we invest in.

Search is about managing climate-related risk by seeking investment opportunities presented by the transition to a low-carbon energy and more climate-resilient world.

In assessing new prospects, we continue to maintain our investment discipline as we would with any potential investment. In 2022 we created a new investment opportunity, the Sustainable Transition Opportunity (STO), designed to invest in assets that will benefit from rapid structural change and the vast amount of capital required to tackle sustainability issues in the coming years.

#### (2) Describe how this process is integrated into your overall risk management

We have adapted our ownership practices and investment decision-making framework to explicitly account for climate change investment risk in our models through a custom Climate Change Valuation Framework. Our Framework has since been adapted by the Accounting for Sustainability (A4S) group as the basis for their Essential Guide to Valuations and Climate Change (https://www.accountingforsustainability.org/valuations.html).

Through this Framework, we manage material and quantifiable climate-related risks and opportunities into our valuation model via three methods: adjusting cash flows (revenue, costs, capital expenditure) during the forecast period; adjusting the terminal value; and adjusting the discount rate to reflect that any reduction in certainties due to perceived climate-related risk. This valuation, along with the qualitative commentary, is reviewed by our Investment Committee and influences whether or not we buy, hold or sell the asset. When we do acquire an asset, we own the asset actively, monitoring business performance against climate change standards and metrics, and periodically reviewing climate change impact analysis.

As well as assessing individual investments, we review the asset types we allocate to. Last year we completed a risk budget review, covering a range of investment areas and their expected ESG profile (including climate change). These were considered alongside each asset type's expected information ratio and alignment with our endowments to decide on the

level of risk budget to allocate to each type. We upweighted infrastructure and down-weighted distressed credit on the basis of their expected ESG profiles.

• (C) No, we do not have any processes to identify, assess, or manage the climate-related risks affecting our investments

  - $\circ$  (1) Metric or variable used
  - (2) Metric or variable used and disclosed
  - (3) Metric or variable used and disclosed, including methodology

(2) Provide link to the disclosed metric or variable, including the methodology followed, as applicable

https://nzsuperfund.nz/news-and-media/nz-super-fund-shifts-25-billion-to-low-carbon-indices-in-sustainability-push/

□ (I) Proportion of assets or other business activities aligned with climate-related opportunities

 $\Box$  (J) Other metrics or variables

• (K) Our organisation did not use or disclose any climate risk metrics or variables affecting our investments during the reporting year

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 46	CORE	N/A	N/A	PUBLIC	Climate change	General

## During the reporting year, did your organisation disclose its Scope 1, Scope 2, and/or Scope 3 greenhouse gas emissions?

☑ (A) Scope 1 emissions

- (1) Indicate whether this metric was disclosed, including the methodology
  - (1) Metric disclosed
  - (2) Metric and methodology disclosed
- (2) Provide links to the disclosed metric and methodology, as applicable

https://nzsuperfund.nz/how-we-invest/sustainable-finance/climate-change/

## (B) Scope 2 emissions

- (1) Indicate whether this metric was disclosed, including the methodology
  - (1) Metric disclosed
  - (2) Metric and methodology disclosed
- (2) Provide links to the disclosed metric and methodology, as applicable

https://nzsuperfund.nz/how-we-invest/sustainable-finance/climate-change/

## C) Scope 3 emissions (including financed emissions)

- (1) Indicate whether this metric was disclosed, including the methodology
  - (1) Metric disclosed
  - (2) Metric and methodology disclosed

(2) Provide links to the disclosed metric and methodology, as applicable

https://nzsuperfund.nz/how-we-invest/sustainable-finance/climate-change/

• (D) Our organisation did not disclose its Scope 1, Scope 2, or Scope 3 greenhouse gas emissions during the reporting year

## SUSTAINABILITY OUTCOMES

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 47	CORE	N/A	Multiple indicators	PUBLIC	Sustainability outcomes	1, 2

Has your organisation identified the intended and unintended sustainability outcomes connected to its investment activities?

(A) Yes, we have identified one or more specific sustainability outcomes connected to our investment activities

• (B) No, we have not yet identified the sustainability outcomes connected to any of our investment activities

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 47.1	CORE	PGS 47	N/A	PUBLIC	Sustainability outcomes	1, 2

Which widely recognised frameworks has your organisation used to identify the intended and unintended sustainability outcomes connected to its investment activities?

☑ (A) The UN Sustainable Development Goals (SDGs) and targets

(B) The UNFCCC Paris Agreement

☑ (C) The UN Guiding Principles on Business and Human Rights (UNGPs)

☑ (D) OECD frameworks: OECD Guidelines for Multinational Enterprises and Guidance on Responsible Business Conduct for Institutional Investors

(E) The EU Taxonomy

 $\Box$  (F) Other relevant taxonomies

 $\Box$  (G) The International Bill of Human Rights

 $\Box$  (H) The International Labour Organization's Declaration on Fundamental Principles and Rights at Work and the eight core conventions

 $\Box$  (I) The Convention on Biological Diversity

☑ (J) Other international framework(s)

Specify:

Net Zero Asset Owners Commitment, Paris Aligned Investment Initiative, IIGCC

 $\Box$  (K) Other regional framework(s)

 $\Box$  (L) Other sectoral/issue-specific framework(s)

• (M) Our organisation did not use any widely recognised frameworks to identify the intended and unintended sustainability outcomes connected to its investment activities

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 47.2	CORE	PGS 47	PGS 48	PUBLIC	Sustainability outcomes	1, 2

# What are the primary methods that your organisation has used to determine the most important intended and unintended sustainability outcomes connected to its investment activities?

(A) Identify sustainability outcomes that are closely linked to our core investment activities

 $\Box$  (B) Consult with key clients and/or beneficiaries to align with their priorities

☑ (C) Assess which actual or potential negative outcomes for people are most severe based on their scale, scope, and irremediable character

(D) Identify sustainability outcomes that are closely linked to systematic sustainability issues

(E) Analyse the input from different stakeholders (e.g. affected communities, civil society, trade unions or similar)

 $\Box$  (F) Understand the geographical relevance of specific sustainability outcome objectives

□ (G) Other method

• (H) We have not yet determined the most important sustainability outcomes connected to our investment activities

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 48	CORE	PGS 47.2	PGS 48.1, SO 1	PUBLIC	Sustainability outcomes	1, 2

Has your organisation taken action on any specific sustainability outcomes connected to its investment activities, including to prevent and mitigate actual and potential negative outcomes?

(A) Yes, we have taken action on some of the specific sustainability outcomes connected to our investment activities
 (B) No, we have not yet taken action on any specific sustainability outcomes connected to our investment activities

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 48.1	PLUS	PGS 48	N/A	PUBLIC	Sustainability outcomes	1, 2

### Why has your organisation taken action on specific sustainability outcomes connected to its investment activities?

☑ (A) We believe that taking action on sustainability outcomes is relevant to our financial risks and returns over both short- and long-term horizons

 $\Box$  (B) We believe that taking action on sustainability outcomes, although not yet relevant to our financial risks and returns, will become so over a long-time horizon

 $\Box$  (C) We have been requested to do so by our clients and/or beneficiaries

☑ (D) We want to prepare for and respond to legal and regulatory developments that are increasingly addressing sustainability outcomes

(E) We want to protect our reputation, particularly in the event of negative sustainability outcomes connected to investments

(F) We want to enhance our social licence-to-operate (i.e. the trust of beneficiaries, clients, and other stakeholders)

 $\Box$  (G) We believe that taking action on sustainability outcomes in parallel to financial return goals has merit in its own right  $\Box$  (H) Other

### **HUMAN RIGHTS**

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 49	PLUS	PGS 47	PGS 49.1	PUBLIC	Human rights	1, 2

During the reporting year, what steps did your organisation take to identify and take action on the actual and potentially negative outcomes for people connected to your investment activities?

# (A) We assessed the human rights context of our potential and/or existing investments and projected how this could connect our organisation to negative human rights outcomes

Explain how these activities were conducted:

ESG considerations are integrated into our investment decision process. This includes the social category, including human rights and labour standards. These aspects are considered as part of our standard due diligence and risk assessment process for new investments. In respect of global equities, we monitor the ESG performance of companies in the portfolio using MSCI ESG and controversy ratings.

 $\Box$  (B) We assessed whether individuals at risk or already affected might be at heightened risk of harm

 $\Box$  (C) We consulted with individuals and groups who were at risk or already affected, their representatives and/or other relevant stakeholders such as human rights experts

 $\Box$  (D) We took other steps to assess and manage the actual and potentially negative outcomes for people connected to our investment activities

• (E) We did not identify and take action on the actual and potentially negative outcomes for people connected to any of our investment activities during the reporting year

(A1) Sustai	nability Outcome #1:	Net Zero Asset Owners Commitment (NZAOC) - to address climate change and its impact on society and the environment by supporting the outcome of limiting global warming to 1.5 degrees in line with the Paris Agreement. We have committed to the Paris Aligned Investment Initiative's NZAOC with the goal of net zero portfolio GHG emissions by 2050, or sooner, drawing on the Net Zero Investment Framework.						
(1) Target r	ame	Reduction in emi	ssions intensity					
(2) Baseline	e year	2022						
(3) Target t	o be met by	2025						
(4) Method	ology	In 2016/17 the Guardians developed a Climate Change Investment Strategy, which was implemented with effect from June 2017. It included carbon reduction targets for the overall Fund, measured relative to our original unadjusted benchmark Reference Portfolio.						
		We use carbon footprinting to measure the carbon exposure of the Fund, with the carbon footprint published each year following a third-party assessment. We set targets for the carbon emissions intensity of the global equities portfolio, which measures the portfolio in terms of carbon emissions per unit of output and provides a measure of the overall efficiency of the portfolio by comparing emissions with the economic activity that produces them.						
					g the Paris Aligned Inve ur approach under the N			
					relative to our referenc of the Reference Portfo			

Baseline performance: 194.8 Emissions Intensity per \$ of firms sales tonnes of CO2e/\$USm Sales Target year: 2025 Target(s): 40% by 2025 emissions Intensity per \$ of firms sales tonnes of CO2e/\$USm Sales relative to the 2025 CO2e/\$USm Sales of the ACWI IMI.

GHG scopes included: Our targets are based on scope 1 and 2 emissions only due to data limitations for our unlisted assets. However, we are looking to include scope 3 emissions over time. Our investments into Paris Aligned Benchmark indices already incorporate scope 3 emissions.

Asset classes in scope: Listed equity, direct investments, investment through funds, including real estate and infrastructure. Currently, our market cap approach to accounting approach does not attribute emissions to fixed income. Further, we attribute nil emissions (and revenue) to our strategic tilting program and other market neutral strategies (mainly executed through derivatives), as well as life settlements, natural catastrophe insurance, active collateral, and 5G spectrum. We plan to review our approach to carbon accounting and whether these assets will be covered by our targets, should they have carbon attributed to them.

Methodology/net zero scenarios: We had targets in place prior to signing up to the Paris Aligned Asset Owners Commitment, so rather than setting a new target, we have tested whether our target was sufficiently ambitious. The IPCC Special Report on Global Warming of 1.5oC suggests that real world emissions need to decrease by 50% by 2030. Our targets seek to deliver a 40% reduction 5 years earlier.

Emissions metrics: Our Reference Portfolio had 3.5m tonnes CO2-e scope 1 and 2 emissions and an emissions intensity of 230.7 per tonnes of CO2-e per US\$m revenue in 2019. This compares to 2.9m tonnes CO2-e and a carbon intensity of 194.8 per tonnes of CO2-e per US\$m revenue in 2022. This means that our targets are more ambitious than the same percentage targets set against a historical benchmark – we would have achieved a 60.6% and a 56.9% respectively against the historic benchmark versus a 49.0% reduction compared to our actual benchmark. We will continue to monitor this and may review our targets if this changes.

In 2022, as part of a wider review of our responsible investment approach, the Board elected to change the ACWI IMI building block of our Reference Portfolio to the MSCI World Climate Paris Aligned Index and the MSCI EM Climate Paris Aligned Index. As well as improving the overall ESG profile of the Fund, these indices will ensure that the Fund's passive global equity positions are better aligned with net zero objectives.

			The new indices reduce GHG emissions intensity by 50%, reduce the GHG emissions intensity by a further 10% each year until 2050, integrate Scope 3 emissions into targets, underweight companies facing high transition and physical climate risk, increase allocation to companies with credible emissions reduction targets, increase exposure to green revenue and overweight companies providing climate solutions. Although we have moved to Paris aligned indices, we continue to maintain the emissions intensity targets that are in place.

Target name:		Reduction in emissions intensity					
Does your organisation track progress against your nearest-term sustainability outcome targets?				(1) Yes			
Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle	
SO 4.1	PLUS	SO 4	N/A	PUBLIC	Tracking progress against targets	1	

During the reporting year, what qualitative or quantitative progress did your organisation achieve against your nearest-term sustainability outcome targets?

(A1) Sustainability Outcome #1:	Net Zero Asset Owners Commitment (NZAOC) - to address climate change and its impact on society and the environment by supporting the outcome of limiting global warming to 1.5 degrees in line with the Paris Agreement. We have committed to the Paris Aligned Investment Initiative's NZAOC with the goal of net zero portfolio GHG emissions by 2050, or sooner, drawing on the Net Zero Investment Framework.
(1) Target name	Reduction in emissions intensity
(2) Target to be met by	2025
(3) Metric used (if relevant)	Emissions intensity in tonnes CO2e/\$m sales (amount of carbon emissions divided by \$m of company sales)
(4) Current level or amount (if relevant)	In FY2021/22 we exceeded our emissions reductions targets. We reduced the carbon emissions intensity of the global equities portfolio by 49% and 91.2% of potential emissions from carbon reserves, compared with targets of 40% and 80% respectively by 2025. In FY2022/23 we again exceeded our emissions reductions targets. The Fund's 2023 carbon footprint has been reduced by an estimated -59.7% as measured by emissions intensity (target -40%) and -98.8% as measured by fossil fuel reserves (target -80%). These percentage reductions are measured against the Fund's unadjusted Reference Portfolio as at 30 June 2023 (i.e. what the Fund would have owned if we hadn't implemented the carbon reductions). The figures and methodology have been subject to limited external assurance and published as part of our Climate Change Report in October 2023.
(5) Other qualitative or quantitative progress	In 2021 we signed up to the Paris Aligned Investor Initiative Net Zero Asset Owner Commitment. This includes a commitment to transitioning investments to achieve net zero portfolio GHG emissions by 2050, or sooner, drawing on the Net Zero Investment Framework to deliver these commitments. In 2022, as part of a wider review of our responsible investment approach, the Board elected to change the ACWI IMI building block of our Reference Portfolio to the MSCI World Climate Paris Aligned Index and the MSCI EM Climate Paris Aligned Index.

As well as improving the overall ESG profile of the Fund, these indices will ensure that the Fund's passive global equity positions are better aligned with net zero objectives. The new indices:

- reduce the GHG emissions intensity by 50%;
- reduce the GHG emissions intensity by 10% each year until 2050;
- integrate Scope 3 emissions into targets;
- underweight companies facing high transition and physical climate risk;
- increase allocation to companies with credible emissions reduction targets;
- increase exposure to green revenue; and
- overweight companies providing climate solutions.

Engagement - Our Climate Change Investment Strategy has four pillars (GHG emissions reduction, analysis, search for opportunities that support the transition and engagement). The goal of the engage pillar is to improve the reporting and management of climate-related risks by the companies we invest in. We concentrate our direct engagement in New Zealand, where we have the scale to play a leadership role. Internationally, where we are a relatively small player, we focus on collaboration with others and lending support to the multilateral initiatives we believe will have the greatest impact. In the NZ context, through 2021 we worked with The Treasury and the other Crown Financial Institutions to development the Crown Responsible Investment Framework, which was announced by the Minister of Finance in October 2021.

In response to the framework, the four investors committed to transitioning their investment portfolios to be aligned with a net zero emissions economy by 2050 or sooner. They joined the Paris Aligned Investment Initiative's Net Zero Asset Owners Commitment, committing to reductions in portfolio carbon footprint in line with a globally accepted pathway.

The Funds also committed to seek to invest in climate solutions in New Zealand and abroad, consistent with their respective investment strategies and commercial mandates. Since the framework was developed the Funds have made significant changes to their investment portfolios, moving to low carbon indices as their global equities benchmarks.

In addition, the CFIs agreed to use their collective influence as asset owners to engage with companies on climate change and emissions reductions, with the objective of achieving net zero by 2050 or sooner.

	The framework sends a strong signal to the broader New Zealand investment industry that best practice is aligning around net zero by 2050 emissions targets. In May 2023, the CFIs began a programme of engagement on climate change with listed New Zealand companies, in particular the top 50 listed companies. The purpose of the engagement is to ensure that companies understand investor expectations as we transition to a low-carbon economy. This includes measuring and reporting on carbon and other GHG emissions in line with best-practice guidelines, and meaningful reduction plans.
	The steps taken in the engagement programme include a joint position statement on climate change released in May 2023; CFIs sent a joint letter to the Chairs of all companies listed on the NZX50 in June setting out our expectations around climate change reporting and the transition to net zero; a CFI working group is working to determine priority companies for direct engagement, developing engagement plans for each company and will continue to monitor the response of other companies; CFIs expect to engage directly with 15 companies by December 2024 and will then review the outcome of the programme. The decision about which companies to engage directly is based on a combination of factors, including the company emissions profile, reporting (whether they have published TCFD report and their plan around reporting on climate related disclosures), whether they have emissions reductions targets, assessment of governance and strategy and their operating sector. The engagement programme leverages the mandatory climate related disclosure standards, released by the NZ External Reporting Board in December 2022.
(6) Methodology for tracking progress	Annual carbon footprint report published; Climate Change Report published annually; Climate Action Plan submission required by as part of the Paris Aligned Asset Owner Commitment.

# INDIVIDUAL AND COLLABORATIVE INVESTOR ACTION ON OUTCOMES

## LEVERS USED TO TAKE ACTION ON SUSTAINABILITY OUTCOMES

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SO 5	PLUS	SO 2	Multiple	PUBLIC	Levers used to take action on sustainability outcomes	1, 2, 5

During the reporting year, which of the following levers did your organisation use to take action on sustainability outcomes, including to prevent and mitigate actual and potential negative outcomes?

- ☑ (A) Stewardship with investees, including engagement, (proxy) voting, and direct influence with privately held assets Select from drop down list:

### **STEWARDSHIP WITH INVESTEES**

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SO 8	PLUS	SO 5	N/A	PUBLIC	Stewardship with investees	2

During the reporting year, how did your organisation use stewardship with investees to take action on sustainability outcomes, including preventing and mitigating actual and potential negative outcomes?

	(A) Across all sustainability outcomes
(1) Describe your approach	We believe in being an active owner of assets and use the stewardship tools that are relevant to the specific asset to support sustainability outcomes.
	(1) Engagement
	(2) (Proxy) voting at shareholder meetings
(2) Stewardship tools or activities	(4) Nominating directors to the board
used	(5) Leveraging roles on the board or board committees (e.g. nomination committees)
	(6) Taking roles on investee boards
	(7) Working directly with portfolio companies and/or real asset management teams

(3) Example

(B) Sustainability Outcome #1:	Net Zero Asset Owners Commitment (NZAOC) - to address climate change and its impact on society and the environment by supporting the outcome of limiting global warming to 1.5 degrees in line with the Paris Agreement. We have committed to the Paris Aligned Investment Initiative's NZAOC with the goal of net zero portfolio GHG emissions by 2050, or sooner, drawing on the Net Zero Investment Framework.
(1) Describe your approach	
(2) Stewardship tools or activities used	
(3) Example	

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SO 9	PLUS	SO 5	N/A	PUBLIC	Stewardship with investees	2

How does your organisation prioritise the investees you conduct stewardship with to take action on sustainability outcomes, including preventing and mitigating actual and potential negative outcomes?

#### (A) We prioritise the most strategically important companies in our portfolio.

Describe how you do this:

In the global context, much of our global engagement on climate change is carried out through international collaborations with other investors and a specialist engagement service that covers global equities. This gives us a much wider reach than we would have on our own. Through these channels, we engage in partnership with some very large international investors; collectively, our capital carries significantly more weight.

We use the Columbia Threadneedle Investments responsible engagement overlay service (REO) to lead engagements with the companies within our global equity portfolio.

As a REO client, we are able to have an input into the annual process through which priority companies and themes are identified for engagement. We are also members or supporters of Climate Action 100+ and the Transition Pathway Initiative. Climate Action 100+ is an investor-led initiative to ensure the world's largest corporate greenhouse gas emitters take necessary action on climate change. The Transition Pathway Initiative provides an independent, authoritative source of research and data into the progress being made by the financial and corporate world in making the transition to a low-carbon economy

We have voting guidelines on climate change and vote all of our shares in a consistent way.

Our default position is to support climate change-related resolutions, which we do unless there is a compelling reason not to. We recall shares that we have lent out to vote on significant climate change issues.

We prioritise the New Zealand market for stewardship activities, particularly in respect of corporate governance, climate change, and for (in the NZ context) emerging areas such as modern slavery and natural capital. This is because we believe that, as a relatively large investor in a small market, we can provide leadership and have an influence. We prioritise companies and sectors where we have large investments in NZ and we prioritise NZX50 companies.

Select from the list:

### 1

ο3

(B) We prioritise the companies in our portfolio most significantly connected to sustainability outcomes. Describe how you do this:

We are working with other Government-owned investors on a collaborative initiative to engage with New Zealand companies on climate change. We have released a joint position statement on climate change and will engage directly with large New Zealand companies, initially those listed on the NZX50

(https://nzsuperfund.nz/assets/Uploads/CFI\_Climate\_Change\_Position\_Statement\_May\_2023.pdf).

Our engagements with individual New Zealand companies will be prioritized according to the highest emitting NZX50 companies, seeking to:

\*understand their progress on climate change awareness, capability and commitments;

\*understand how they are meeting regulatory requirements on climate-related disclosures and reporting;

\*support companies to prepare for the transition by sharing knowledge of climate change risks and opportunities from the institutional investor perspective;

\*understand how companies' plans will align with our net zero commitments over time.

We will report publicly on the number of engagements and progress made in aggregate in our annual reports, but individual engagements will be confidential.

Select from the list:

### ● 2

#### ο 3

☑ (C) We prioritise the companies in our portfolio to ensure that we cover a certain proportion of the sustainability outcomes we are taking action on.

Describe how you do this:

We have prioritised companies in the NZX50 for engagement on climate change based on their relatively higher emissions. In respect of global equities, we support the work of CA100+ and we contribute to the selection of priority companies indentified by our external engagement services provider CTI reo®.

CBM 3	PLUS	CBM 1	N/A	PUBLIC	Third-party external assurance	6

### Provide details of the third-party external assurance process regarding the information submitted in your PRI report.

(1) Description of the third-party external assurance process

KPMG New Zealand provided limited assurance (dated 13 October 2023) in relation to Guardians of New Zealand Superannuation's ("GNZS") 2023 Carbon Footprint (Emissions Intensity and Fossil Fuel Reserves) for the period 1 July 2022 to 30 June 2023.

KPMG conducted limited assurance engagement in accordance with International Standard on Assurance Engagements (New Zealand) 3000 (Revised) Assurance Engagements other than audits or reviews of historical financial information and International Standard on Assurance Engagements (New Zealand) 3410 Assurance Engagements on Greenhouse Gas Statements ("ISAE (NZ) 3410"). KPMG believe that the evidence obtained is sufficient and appropriate to provide a basis for their conclusion. In accordance with those standards KPMG:

- used professional judgement to plan and perform the engagement to obtain limited assurance that the subject matter is free from material misstatement, whether due to fraud or error;

- considered relevant internal controls when designing assurance procedures, without expressing a conclusion on the effectiveness of these controls; and

- ensured that the engagement team possess the appropriate knowledge, skills and professional competencies.

(2) Assurance standard(s) used by the third-party assurance provider

□ (A) PAS 7341:2020

☑ (B) ISAE 3000 and national standards based on this

□ (C) Dutch Standard 3810N (Assurance engagements regarding sustainability reports)

□ (D) RevR6 (Assurance of Sustainability)

□ (E) IDW AsS 821 (Assurance Standard for the Audit or Review of Reports on Sustainability Issues)

□ (F) Accountability AA1000 Assurance Standard (AA1000AS)

 $\Box$  (G) IFC performance standards

 $\Box$  (H) SSAE 18 and SOC 1

### **INTERNAL AUDIT**

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
CBM 4	CORE	OO 21, CBM 1	N/A	PUBLIC	Internal audit	6

#### What responsible investment processes and/or data were audited through your internal audit function?

#### ☑ (A) Policy, governance and strategy

#### Select from dropdown list:

- (1) Data internally audited
- (2) Processes internally audited
- (3) Processes and data internally audited

#### □ (B) Manager selection, appointment and monitoring

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
CBM 5	PLUS	CBM 1	N/A	PUBLIC	Internal audit	6

### Provide details of the internal audit process regarding the information submitted in your PRI report.

The Guardians' Audit Committee requested assurance that the RI procedures and processes advised to the Crown are operating effectively.

Two core RI processes were included in Internal Audit reviews since the last PRI Assessment, both of which all support our core investment activities:

· Stewardship processes, i.e. the processes for (proxy) voting and the engagement with companies in which we invest;

• Integration (Exclusion/Negative Screening) processes, i.e.

the processes for maintaining and applying the Exclusions List for restricted listed securities.

The audit found the processes established for our Exclusions (Negative Screening of listed securities) and Engagement activities to be operating effectively and were consistent with responses provided to the Crown's recent enquiries. They did not identify any findings in the audit.

A second audit assessed the adequacy of controls for ensuring (proxy) voting processes are managed and monitored efficiently and effectively.

The audit found that processes and control activities undertaken to exercise the Fund's voting rights are well managed and carried out efficiently. Management have demonstrated clear understanding of the risks involved and actively manages and monitors them well. The audit team did not identify any significant control weaknesses within the voting processes.

### **INTERNAL REVIEW**

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
CBM 6	CORE	CBM 1	N/A	PUBLIC	Internal review	6

Who in your organisation reviewed the responses submitted in your PRI report this year?

 $\Box$  (A) Board, trustees, or equivalent

☑ (B) Senior executive-level staff, investment committee, head of department, or equivalent

Sections of PRI report reviewed

(1) the entire report

• (2) selected sections of the report

• (C) None of the above internal roles reviewed selected sections or the entirety of the responses submitted in our PRI report this year
